IS2083 Advanced Scripting

Lab Screenshot Submission

Student name	Sergio Arreola
Class	IS2083 Advanced Scripting
Lab	Lab 2: Windows Hardening Tool

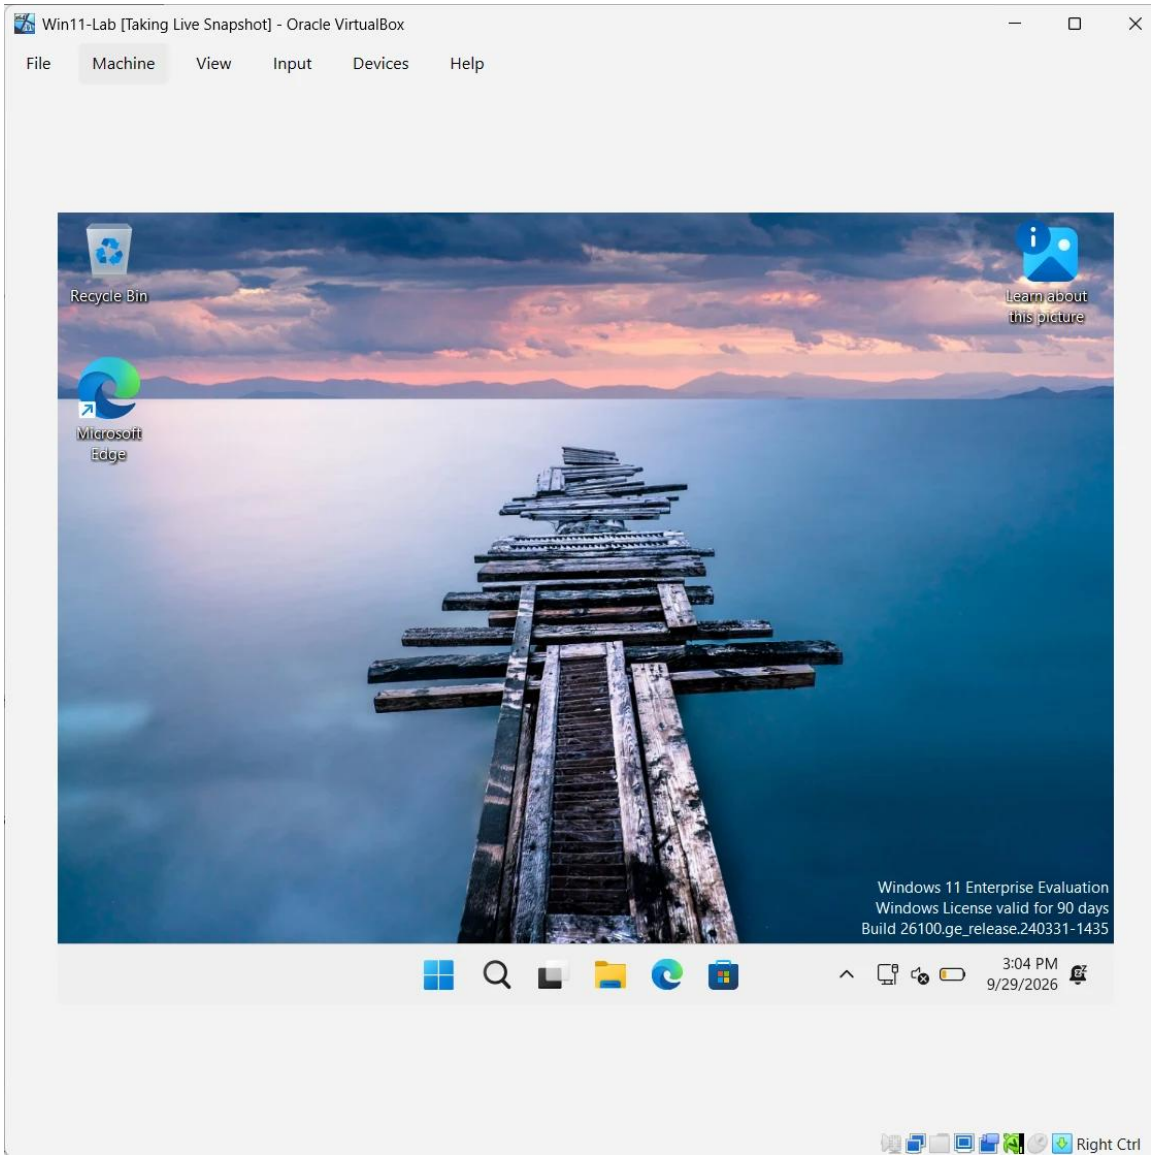

How to use this template. Fill in your name. For each item below, click inside the dashed box and insert your screenshot: Insert > Pictures, or copy the image and press Ctrl+V. Make sure each screenshot clearly shows no errors. Export the finished file as a PDF named with your first initial and last name, for example SPaul_Lab.pdf.

Screenshot 1 Downloaded Windows 11 ISO

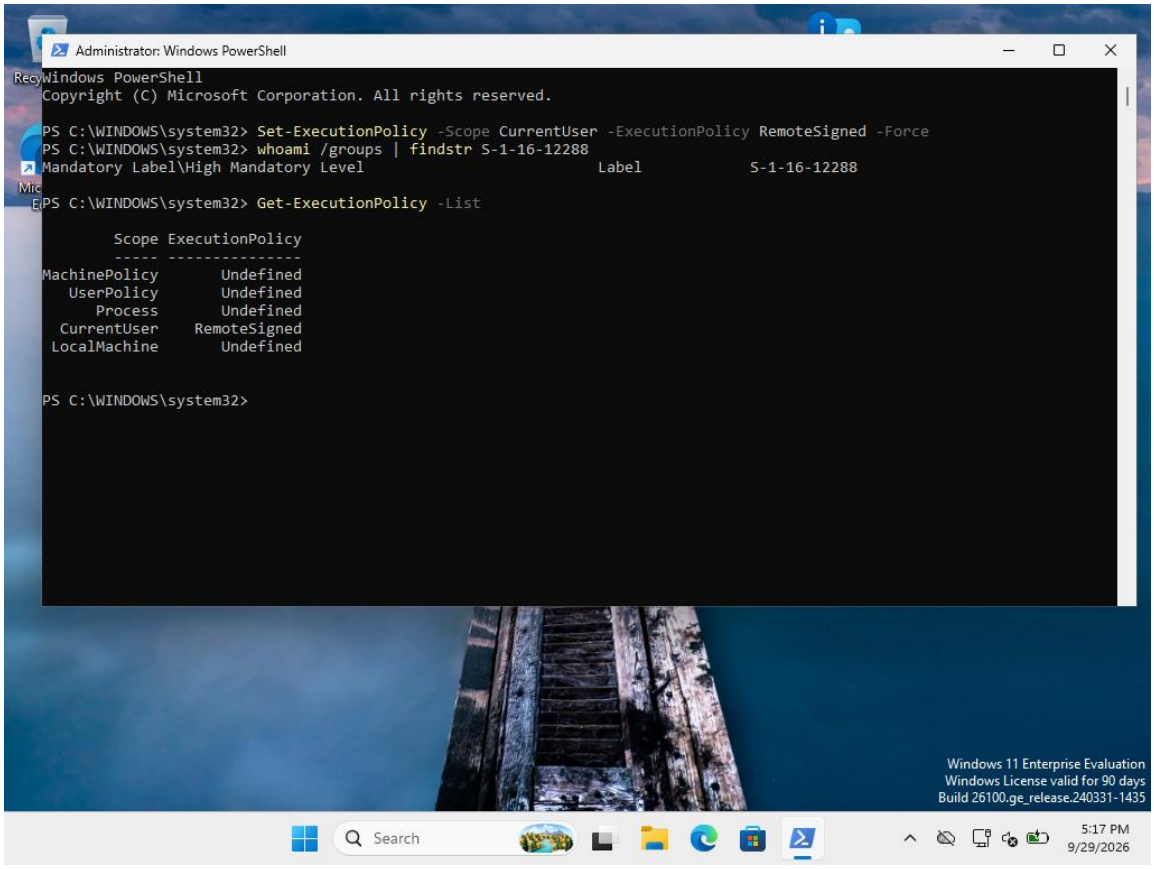

Notes (optional):

Screenshot 2 Windows 11 desktop running in the VM

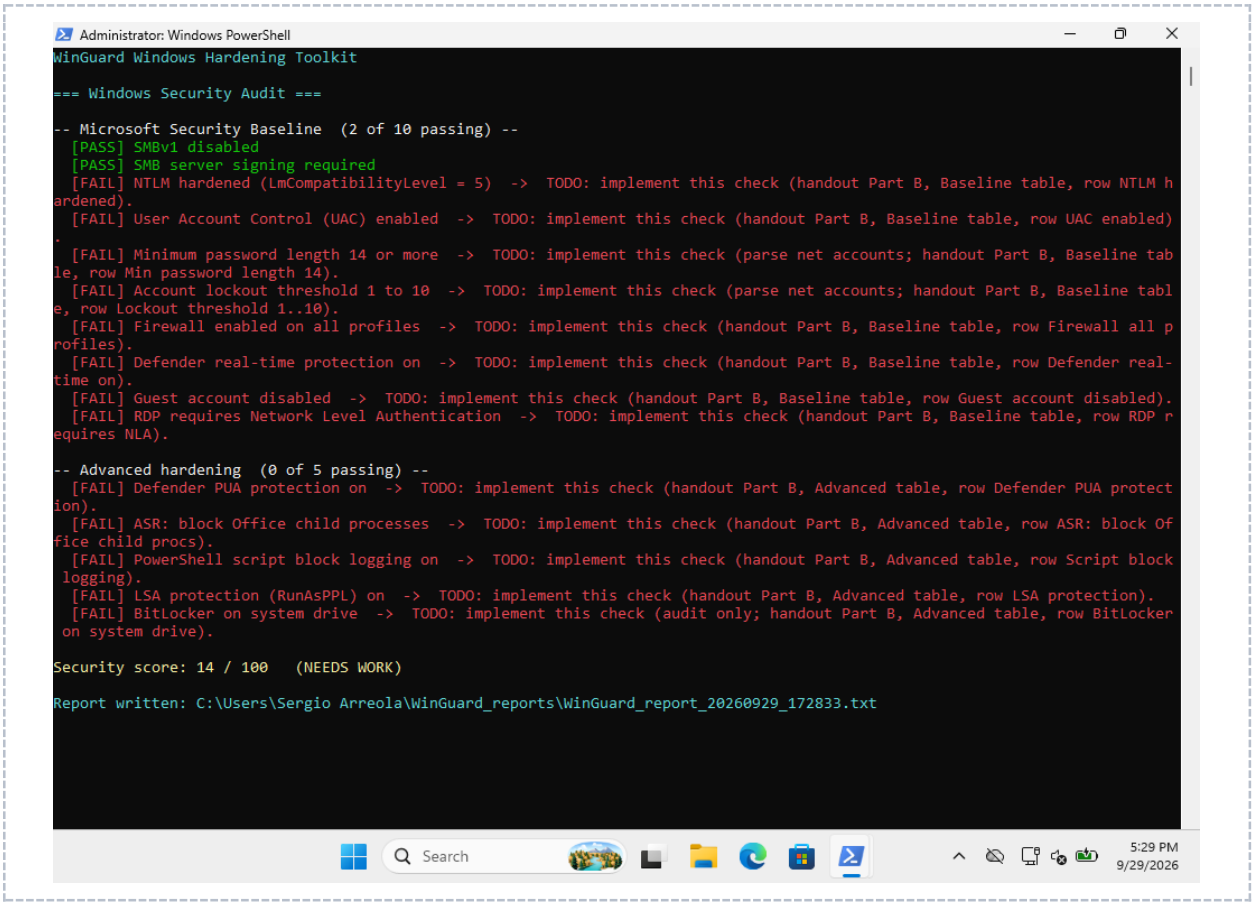

Notes (optional):

Screenshot 3 Elevated PowerShell, execution policy set

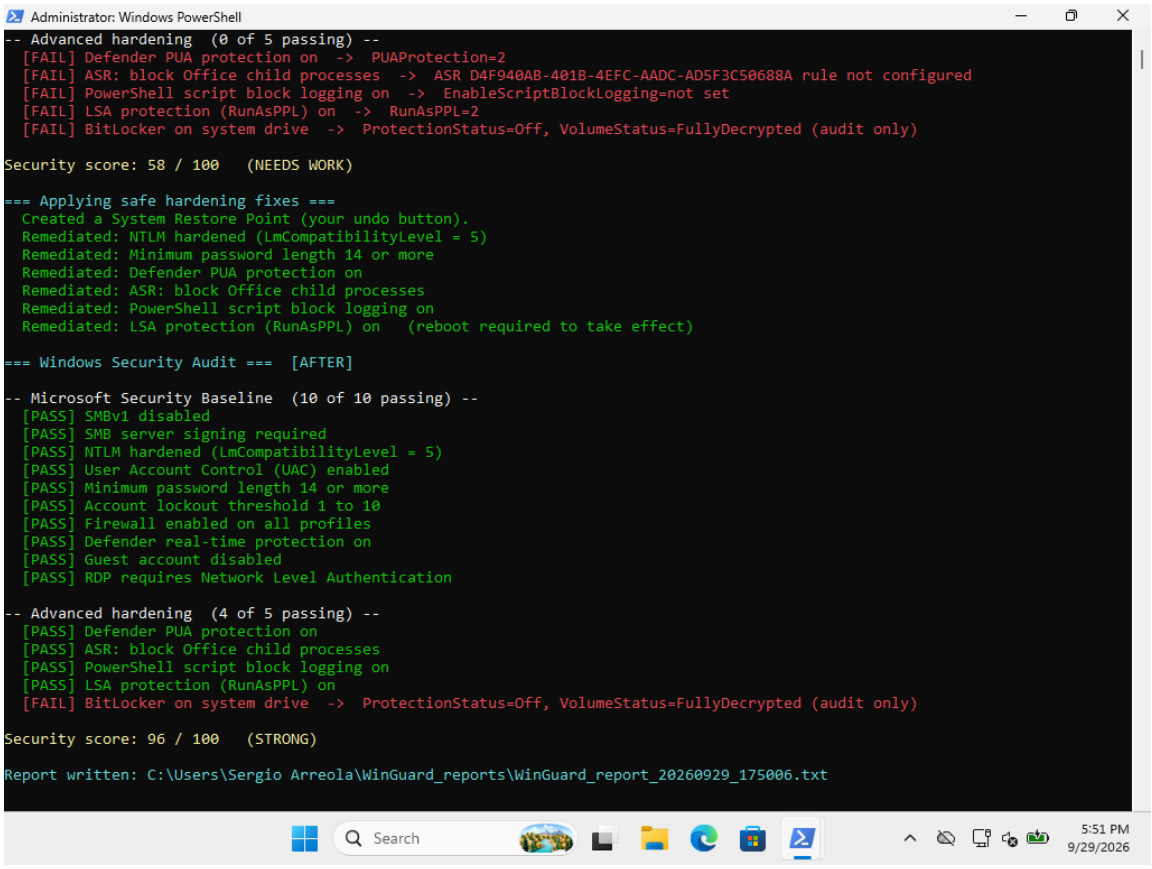

Notes (optional):

Screenshot 4 Boilerplate runs, grouped report

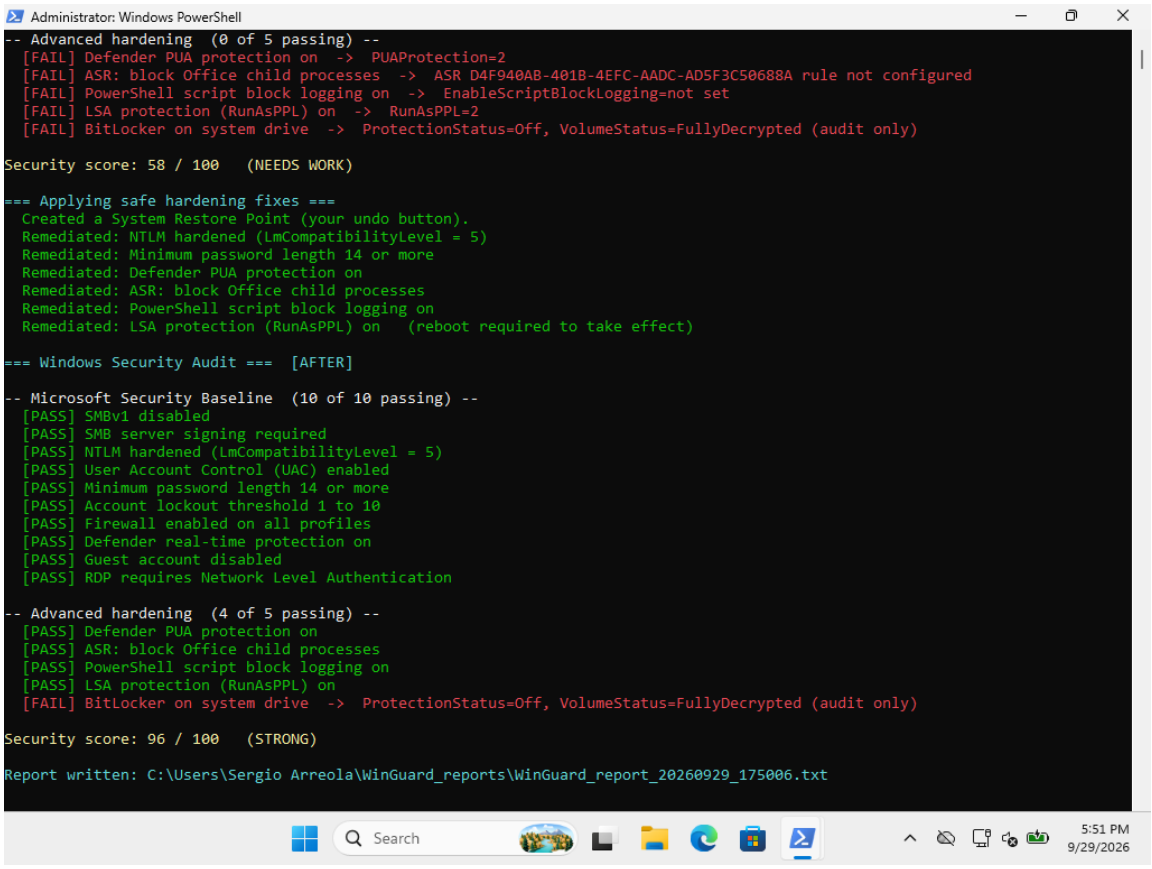

Notes (optional):

Screenshot 5 Baseline controls passing

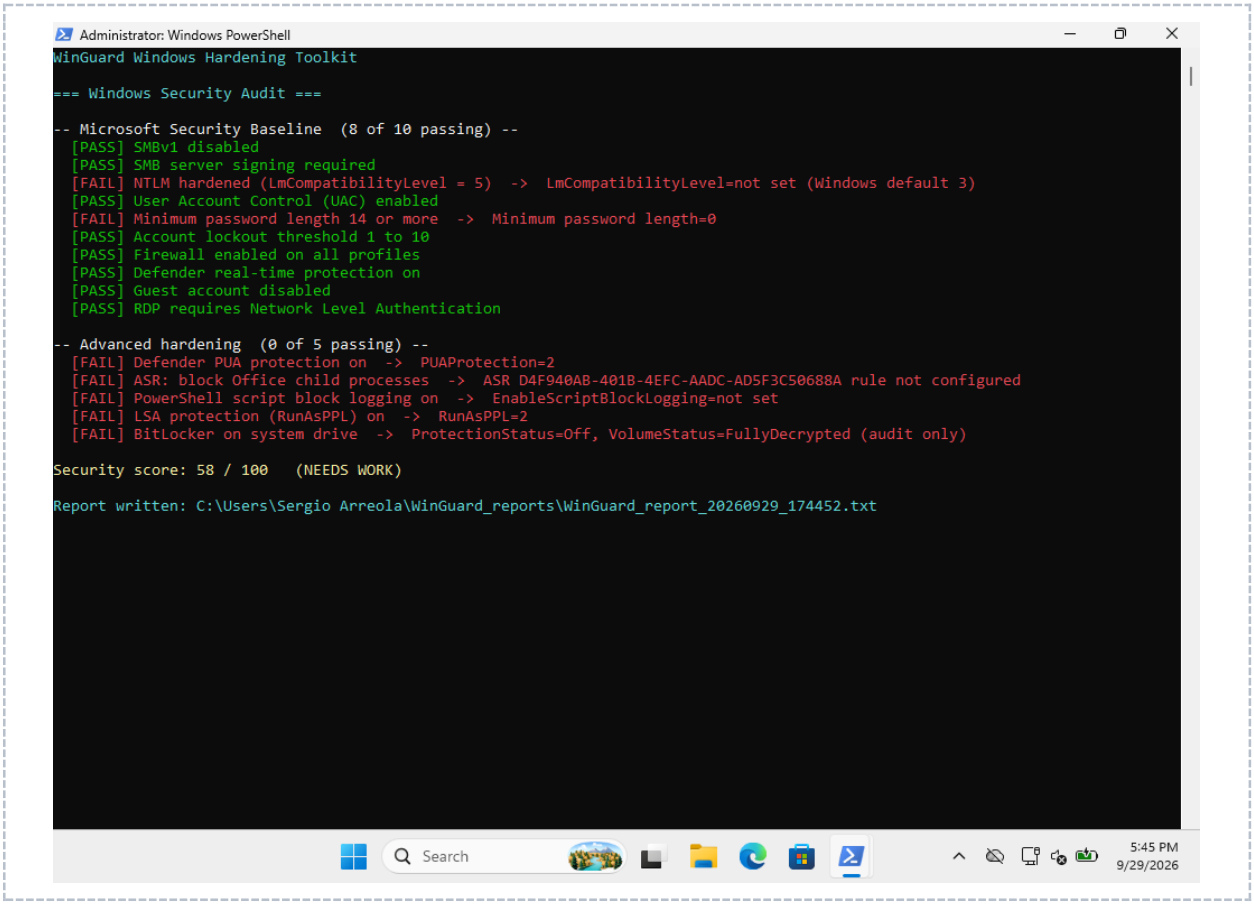

Notes (optional):

Screenshot 6 Advanced controls passing

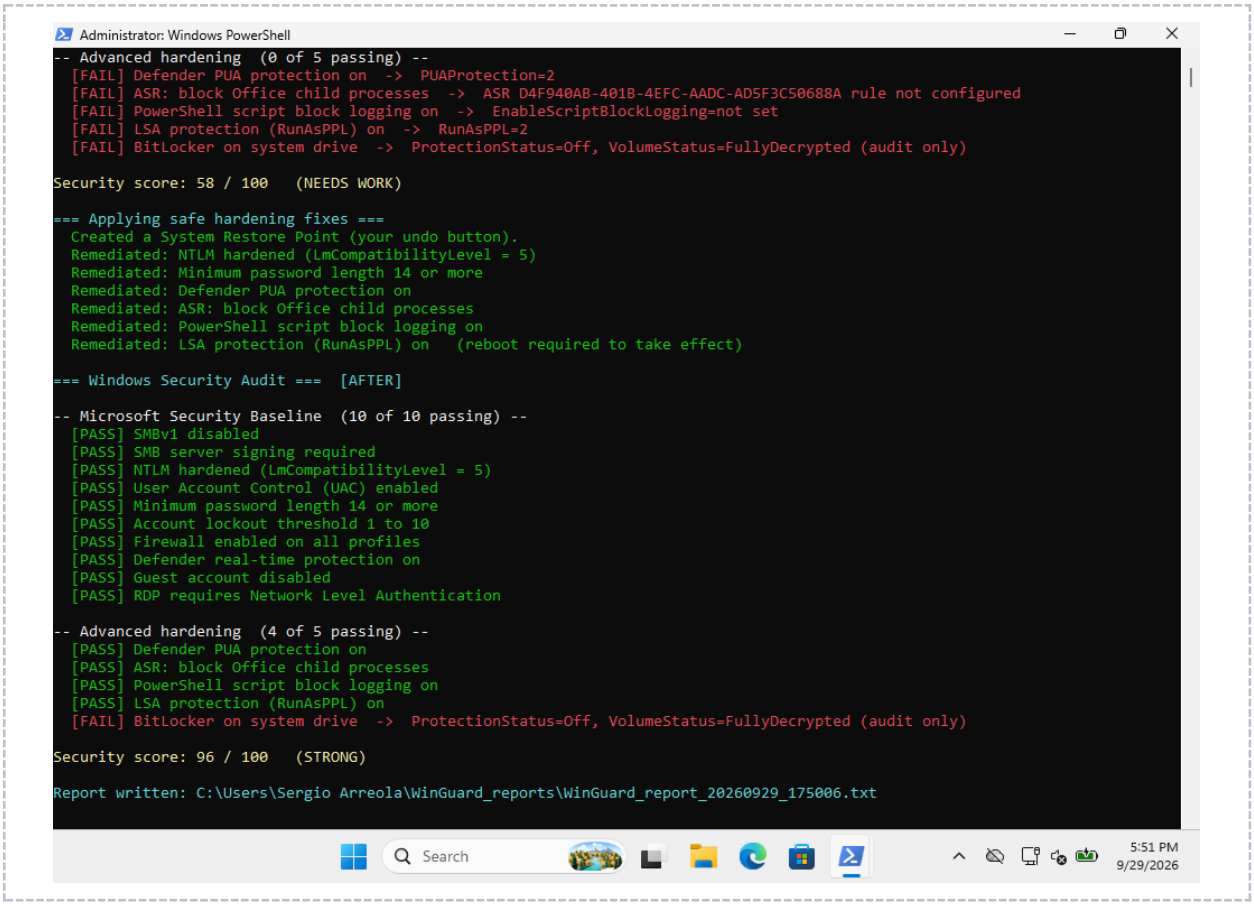

Notes (optional):

BitLocker is an audit-only control and reports FAIL by design; the handout states this is acceptable. All four remediable advanced controls pass.Screenshot 7 Audit report with the security score

Notes (optional):

Screenshot 8 Before and after report, higher score

Notes (optional):

GitHub repository: https://github.com/sarreola07/winguard-windows-hardening | Security score improved from 58/100 (NEEDS WORK) to 96/100 (STRONG). Baseline 8/10 to 10/10, Advanced 0/5 to 4/5.
